## **PERSONAL RESPONSIBILITY AS A SUBJECT OF PSYCHOLOGICAL RESEARCH**

In the article it is grounded the psychological structure and features of development of personal responsibility. Both external factors and internal conditions are analyzed as well as are components, types and mechanisms of sedulity influence on the course of the process of responsible behavior of the individual. Concepts that complement and reveal the psychological content of the phenomenon of personal responsibility are characterized. These include the responsible behavior of the individual as a subject of life-activity of Jean Piaget in which on the first stage of child development appears the objective responsibility and at the higher stages subjective one. M. V. Savchyna determines ternary structure of responsible behavior and selects general and specific mechanisms which influence it. Meaningfulness enrich received the concept of personal responsibility (O.Y.Furman (Gumenyuk)) in terms of a more detailed description of its main types: responsibility, irresponsibility and hiperresponsibility.

**Keywords:** *individuality, responsibility, irresponsibility, components of personal responsibility, responsible attitude, situationalresponsibility, responsible person.*
